

## Symbol Battery Warranty Description

Symbol batteries are warranted against any defects in materials and workmanship for a period of 12 months from the date of shipment, and will maintain a minimum of 80% of their published rated capacity for the warranty period under normal use and service.

Normal use consists of one shift usage per day and does not include damage resulting from improper use. Examples of improper use include, but are not limited to: storage or operation in abnormal conditions; exposure to water, liquid, extreme heat or humidity, sand, dirt, or the like; use in non-designed applications; or removal, alteration or obliteration of date code or lot numbers. Service of batteries, including charging, must be completed with Symbol or Symbol-approved devices.

Although it is unlikely that any kind of damage could be caused by a properly used battery pack, Symbol will repair or replace any device that is damaged as a result of its battery packs under proper use.

Symbol reserves the right to repair, replace or refund the purchase price of, at Symbol's discretion, any battery that does not conform to this warranty. Batteries repaired or replaced under this warranty will only be warranted for the balance of the original warranty period.

If you have a battery that fails to meet Symbol's warranty, please contact Symbol's Customer Interaction Center to request a Return Material Authorization number. No returns will be accepted without a Return Material Authorization number. All returns must be made in accordance with Symbol's Return Material Authorization procedures.
